FLU SHOT CLINICS

2020

IT'S ALWAYS IMPORTANT TO GET YOUR FLU SHOT, but this year it's even more crucial for the health and safety of our communities.

While the flu shot won't protect against the coronavirus, it can help protect you and your family and help reduce the potential for symptoms that could be confused with COVID-19.

THAT'S WHY THE MEIJER PHARMACY TEAM WENT MOBILE
THROUGHOUT OCTOBER & NOVEMBER to ensure anyone who may not have had easy access to a flu shot was able to get vaccinated.

98 COMMUNITY FLU SHOT CLINICS
OF VARYING SIZES WERE HELD BY THE MEIJER PHARMACY TEAM ACROSS MICHIGAN.

3,110 FLU SHOTS
ADMINISTERED BY THE TEAM.

THE PHARMACISTS NOTED THAT

OVER 50% *were* FIRST TIMERS
RECEIVING A FLU SHOT.

THE CLINICS OFFERED

BOTH

DRIVE-THROUGH *and* WALK-IN
FOR PARTICIPANTS AND COMPLIED WITH ALL COVID-19 GUIDELINES

EACH VACCINATION TOOK
LESS THAN 10 MIN
PER PERSON

DUE TO COVID-19

and the recommendations for social distancing, the Meijer Pharmacy Team met individuals where they were to reach more people early in the flu season.
