

### WEDNESDAY, AUGUST 12, 2020 – 6 AM WEATHER FORECAST

We are definitely starting off some gray skies this morning as a band of mid and high clouds are passing overhead, combined with some of the low clouds and patchy fog that formed nearby inland. Look for any patches of fog to not last long early this morning as the sun will burn through the lower level moisture leaving occasional upper level clouds to mix with our sunshine mid to late morning. As the afternoon wears on the sunshine should be filtered less and less by any high level cloud cover. Temps will gradually warm up from the low 50s to the low to mid 60s early this afternoon. The wind is starting off light this morning and it will pick up later on this morning with speeds this afternoon much like yesterday afternoon when our high gust onsite was 23 mph and offsite was 26 mph. The outlook for Thursday and Friday afternoons winds are still stronger than today with gusts up around 30 mph at times. There is still a slight chance of patchy low clouds and fog early Thursday, otherwise both days should feature lots of sunshine and warmer temps in the upper 60s. Saturday has less wind and warmest temps all week, then we'll be watching a marine layer slipping north along the coast from California on Sunday.
