

FRIDAY, AUGUST 14, 2020 – 8 AM WEATHER FORECAST

A ridge of high pressure in the upper atmosphere is building across Oregon and with it, warmer air has arrived. Temps are already in the 60s to start this morning and highs today will be around 70 degrees or so. North and northeast winds today will increase as the morning progresses with speeds similar or just a little less than yesterday. The highest gust off site yesterday was 27 mph, but here at Bandon we did manage one rogue 31 mph gust. The computer models show speeds being potentially about 2 mph less today, although again a random gust up around 30 mph is possible. Otherwise expect speeds to become around 15 mph or so with gusts of 25 mph or more for that early through mid afternoon window. Some high clouds and maybe even some smoke will drift into southwest Oregon tonight with warmer lows in the upper 50s to near 60. Saturday is the peak of the heat wave with highs here at Bandon in the mid to upper 70s (100+ not far inland). The wind will be finicky on Saturday of a lesser velocity coming from the north during the first half of the day, then becoming southwest during the afternoon. Low clouds and patchy fog are possible by dawn Sunday, but the best computer model says we'll see enough sunshine Sunday morning to hit 70 degrees one more time before a California marine layer of low clouds and fog move up from the south Sunday afternoon riding southwest winds.
