

### MONDAY, SEPTEMBER 14, 2020 – 2 PM WEATHER FORECAST

High pressure continues to build into our area this afternoon with gusty north and northwesterly winds pushing dewpoints down through the 50s. Temps are going to remain in the 70s this afternoon as our sunshine is filtered by some high level clouds. Tonight the atmosphere is forecast to clear out and even though it will still be gusty at times, lows are expected to dip close to 50 degrees to begin Tuesday. Look for very low humidity on Tuesday as well with dewpoints in the 40s and highs in the 60s under lots of sunshine. High pressure will glide right through NYC tomorrow giving us less wind from the north early and then from the south late. South and southwesterly winds will not allow temps to be quite as cool Tuesday night, however sunshine on Wednesday with breezy southerly flow will bump temps back up into the 70s. Dewpoints in the 50s on Wednesday will reach the 60s on Thursday when highs approach 80 degrees one last time ahead of another cold front. We'll see some increasing clouds on Thursday with the frontal passage now aiming for Thursday evening followed by a cloudier and cooler Friday since the winds become more northerly again and we may have to try and dodge a couple of raindrops. Look for cool, Fall like conditions to continue into this weekend.
