

TUESDAY, SEPTEMBER 15, 2020 – 6 AM WEATHER FORECAST

While the atmosphere is technically very dry today, there will be a white film to the sky at times today as some high altitude smoke from the wildfires along the West Coast filter our sunshine. After a crisp start around 50 degrees, temps will try their best to warm up into the upper 60s this afternoon. Thankfully we'll have less wind today as high pressure passes through our area changing our northerly flow this morning to a more southerly flow this afternoon. In response to the wind shift our comfortably low dewpoints around 40 degrees this morning will rise back towards 50 degrees this evening. Temps will not be quite as cool to start Wednesday with lows in the upper half of the 50s and with a stronger south and southwest wind tomorrow afternoon, highs should be able to climb back into the 70s. Sunny skies on Wednesday may once again have a little upper level smoke mixing in, however dewpoints will definitely be back in the 50s as they reach the 60s on Thursday. Southwesterly breezes will be a little less on Thursday and even though our sunshine will be giving way to increasing clouds, temps are forecast to approach 80 degrees. Then our wind will quickly turn and come from the north Thursday night as a front ushers in cooler, more Fall like weather for the rest of the Championship.
