

FRIDAY, SEPTEMBER 18, 2020 – 6 AM WEATHER FORECAST

Thankfully pretty much all the moisture associated with the remnants of Sally stayed to our south and east more so over Long Island at times last night. We still have a random 40% risk of seeing a passing sprinkle this morning, but the main story today should become the cooler weather and the wind. Temps are starting off around 60 degrees this morning and we will try to get close to 70 degrees early this afternoon, however expect it to stay in the 60s much of the day. Dewpoints are in the 50s and will be dropping into the 40s as the day wears on due to north and northeast winds that will increase over the next few hours to spend most of the daytime hours in the 10-15 mph range with gusts occasionally 15-20 mph. There will be some breaks in the clouds this morning, so we'll call it a mostly cloudy to partly sunny morning followed by a transition eventually over to mostly sunny skies this afternoon (more blue to the sky today as well). High pressure controls our weather this weekend with near record lows possible each morning in the mid 40s and highs each afternoon in the mid 60s under sunny skies.
