

SUNDAY, DECEMBER 13th, 2020 – 6 AM WEATHER FORECAST

Temperatures are already moderating through the 50s and as our wind comes more from the east and south through the first half of the day, expect temps and dewpoints to warm up through the 60s before crashing this evening. The radar is already lighting up with showers to our southwest heading in our direction and there is already some activity well to our south that has electricity. Therefore expect on and off showers to move into our area this morning with a rogue storm possible around 9 AM. As we get closer to lunchtime showers and embedded storms will become more numerous around Houston as a cold front marches through Champions around 3 PM. The model consensus has our rainfall totals for today creeping closer to half an inch, then we are going to see all this wet weather exit tonight with strong, gusty north winds ushering in a cloudy and colder forecast for Monday.
