Volvo XC60, XC60 Recharge score safety awards

ARLINGTON, Va. — The 2023-24 Volvo XC60 and plug-in hybrid XC60 Recharge, both midsize luxury SUVs, earn *TOP SAFETY PICK* awards from the Insurance Institute for Highway Safety.

To qualify for *TOP SAFETY PICK* in 2023, a vehicle must earn good ratings in the driver-side small overlap front, passenger-side small overlap front and original moderate overlap front tests as well as an acceptable or good rating in the updated side test. Acceptable or good headlights must be standard across all trims, and a front crash prevention system that earns an advanced or superior rating in the daytime vehicle-to-pedestrian evaluation must be available.

For the higher-tier *TOP SAFETY PICK+* award, a good rating in the updated side test is required, and vehicles need to demonstrate advanced or superior performance in both the daytime and nighttime pedestrian tests.

The two Volvos come with standard front crash prevention systems that earn superior ratings in the daytime evaluation and advanced ratings in the nighttime test, and all trims are equipped with acceptable-rated LED reflector headlights.

Acceptable ratings in the updated side test prevent both vehicles from qualifying for the “plus.”
