## Roomba® Robot Vacuum

### Roomba j7+ Fast Facts

The iRobot® Roomba® j7+ Self-Emptying Robot Vacuum is a thoughtful, collaborative cleaning partner that delivers superior cleaning performance with every mission. Powered by iRobot OS and featuring PrecisionVision Navigation, the Roomba j7+ gets smarter with each use.

#### Identifies obstacles and avoids hazards

- Roomba j7+ doesn't just learn your home, it reacts to it in real time with PrecisionVision Navigation, giving the robot the ability to identify and avoid objects on your floor, such as shoes, socks, clothes, towels, cords and solid pet waste.
- Built with more pet features than any other robot, Roomba j7+ is the only robot that guarantees that it identifies and avoids pet waste; backed by a 'Pet Owner Official Promise,' iRobot will replace any Roomba j7+ that doesn't avoid pet waste.<sup>1</sup>
- PrecisionVision Navigation will also get smarter over time, allowing the Roomba j7+ to identify an even greater number of obstacles and unlock new cleaning experiences.
- Combined with Imprint® Smart Mapping, the Roomba j7+ can learn a home's floor plan, giving customers control to choose which rooms are cleaned when using the iRobot Home App or a voice assistant device.

<sup>1</sup>Offer valid for 1 year from purchase and covers replacement product only.  
Available in limited jurisdictions, additional terms and conditions apply.

#### Keeps you in the loop, follows your instruction

- When the Roomba j7+ identifies a hazard or obstacle it will send a photo to the iRobot Home App at the end of a cleaning job, where users can provide feedback in the App on how the Roomba j7+ should handle such obstacles in the future.
- This helps keep users in the loop and aware of any clutter or hazards, like pet waste, in the home. It also helps ensure that the robot will successfully complete the job.

#### The smarts behind Roomba

- The Roomba j7+ with iRobot OS delivers greater levels of personalization, new home automations and the ability to get smarter over time – giving users a more intuitive cleaning experience and more time back in their day.
- The Roomba j7+ learns how you like to clean and automatically gives you personalized suggestions, even factoring in times when your home may need more frequent cleaning –like pet-shedding or allergy seasons.
- Since the Roomba j7+ remembers the specific rooms and times you like to clean, it can suggest personalized cleaning schedules, like in the kitchen after breakfast.
- The Roomba j7+ can also leverage other features powered by iRobot OS, such as Clean While I'm Away, Smart Map Coaching with Room Name Suggestions, Cleaning Time Estimates, Quiet Drive and Pet Lock.
- iRobot OS understands more voice commands than any other robot, with approximately 600 supported Alexa® and Google Assistant® commands - and Siri Shortcut Integration.

## Designed to be in a class of its own

- The Roomba j7+ blends seamlessly into homes with its appealing spun metal finish and intuitive one-button design.
- The robot's base has been redesigned from the ground-up to fit under tables and take up less space. The new look includes a premium, textured style and rich leather pull tab for the lid that reveals a hidden storage compartment for extra Clean Base bags.
- The Roomba j7+ offers the full iRobot robot vacuum cleaning experience with cutting edge, patented technology that sets Roomba apart from the competition, including:
  - › A 3-Stage Cleaning System with Dual Multi-Surface Rubber Brushes to tackle dust, dirt, and pet hair on a variety of floor types; an Edge-Sweeping Brush for walls and corners; and 10x the Power-Lifting Suction<sup>2</sup> that pulls in stubborn dirt and messes.
  - › Patented Dirt Detect™ technology to focus on the especially dirty spots in the home.

<sup>2</sup>Compared to Roomba® 600 Series AeroVac™ System

## Automatic emptying, months at a time

- You don't have to touch dust and dirt for months because the Roomba j7+ automatically empties into the base with an enclosed bag that doesn't need to be replaced for up to 60 days – 2x as long as other brands claim. The bag traps dirt and debris for easy disposal without a dust cloud.
- The Roomba j7+ is designed to keep dirt and debris contained from the robot's dustbin through to the Clean Base Dirt Disposal bag – catching particles as small as .7 microns to prevent the release of dirty air back into the home.
- The Roomba j7+ automatically empties and recharges as needed and continues cleaning until the job is done.

## Tag Team: Roomba® vacuums, then Braava jet® mops

- Using Imprint Link Technology, the Roomba j7+ coordinates with the Braava jet m6 robot mop to deliver an extra level of clean by automatically vacuuming then mopping, without any effort from the user.
- Users can initiate a linked clean in the iRobot Home App, where they have the option to choose specific rooms for the robots to clean or an entire level of their home. The Roomba j7+ will go out and vacuum the selected area. Once the Roomba robot docks, the Braava jet m6 robot will leave its dock and begin mopping.
