## Roomba Combo™

Robot Vacuum & Mop

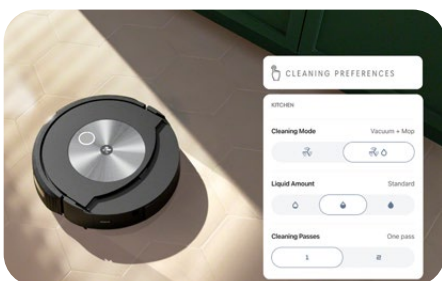

### Roomba Combo j7+ Fast Facts

The iRobot® Roomba Combo™ j7+ with Automatic Dirt Disposal is the world's most advanced 2-in-1 robot vacuum and mop, and the first truly hands-free 2-in-1 with a fully retractable mop pad. Powered by thoughtful iRobot OS home intelligence, the Roomba Combo j7+ is designed for busy households with a mixture of carpets, rugs and hard floors, and those who want a robot vacuum that can also mop.

### The World's most advanced robot vacuum and mop

- The Roomba Combo j7+ is the only 2-in-1 with a mop that lifts itself to the top of the robot, completely away from carpet and rugs, preventing wet carpet messes.
- The robot's two fully retracting, durable, metal mop arms raise the mop pad when the robot senses carpet and rugs, allowing Roomba Combo j7+ to vacuum and mop in a single cleaning job, saving time while keeping floors fresh and clean.
- Roomba Combo j7+ doesn't just learn your home, it reacts to it in real time with PrecisionVision Navigation, giving the robot the ability to identify and avoid common obstacles, such as cords, clothes, shoes, socks, backpacks, pet bowls, pet toys and solid pet waste.
- The Roomba Combo j7+ recognizes more than 80 common objects,<sup>1</sup> which enables the robot to also clean more specific places on command, like around kitty litter boxes, toilet bowls, dishwashers and more.

<sup>1</sup>Robot behavior varies by object.

### iRobot OS home intelligence – clean where you want, when you want

- Thanks to iRobot OS and the robot's PrecisionVision Navigation system, customers don't have to worry about cleaning up before the cleaning begins.
- The Roomba Combo j7+ can specifically clean around objects like couches, tables, counters and holiday trees, and can also automatically detect and proactively recommend Clean Zones around dishwashers, toilets, ovens/stoves, litter boxes and pet bowls.
- To make cleaning even easier, pair the robot with your voice assistant and simply tell it to clean specific rooms or by specific objects in your home, and it does what you ask instantly. The Roomba Combo j7+ understands approximately 600 voice commands, more than any other 2-in-1.
- The Roomba Combo j7+ will also get smarter over time, allowing it to identify an even greater number of obstacles and unlock new cleaning experiences.

## Automatic emptying, months at a time

- You don't have to touch dust and dirt for months because the Roomba Combo j7+ automatically empties into the Clean Base® with an enclosed bag that doesn't need to be replaced for up to 60 days. The bag traps dirt and debris for easy disposal without a dust cloud.
- The Roomba Combo j7+ is designed to keep dirt and debris contained from the robot's dustbin through to the Clean Base Dirt Disposal bag.
- The Roomba Combo j7+ automatically empties and recharges as needed and continues cleaning until the job is done.

## Designed to be in a class of its own

- The Roomba Combo j7+ blends seamlessly into homes with its appealing spun metal with matte finish and intuitive one-button design.
- The Roomba Combo j7+ features an integrated bin and tank, providing one place to fill the tank and empty the bin to keep things simple.
- The Roomba Combo j7+ offers the full iRobot robot vacuum cleaning experience, in addition to mopping capabilities, thanks to patented technology that sets Roomba apart from the competition, including:
  - › The 4-Stage Cleaning system combines our Edge-Sweeping Brush, Dual Multi-Surface Rubber Brushes and first-of-its-kind mopping; and 10x the Power-Lifting Suction<sup>2</sup> that pulls in stubborn dirt and messes.
  - › Patented Dirt Detect™ technology to focus on the especially dirty spots in the home.

<sup>2</sup>Compared to Roomba® 600 Series AeroVac™ System
