Roomba®

Roomba® 205 DustCompactor™ Vac

The Roomba® 205 DustCompactor™ Vac Robot features industry-leading innovation inside. Debris is suctioned up, continuously compacted, and contained inside the robot for up to 60 days at a time. Floors are barefoot-ready with 70X stronger power-lifting suction* and smarter navigation with ClearView™ LiDAR.

**As compared to Roomba® 600 series robots*

Cleaning and compacting in one clever robot.

- **Up to 75 days hands-free cleaning:** Dirt and dust stay gone because it empties into the AutoEmpty™ dock with a bag that traps 99% of allergens as small as 0.7 microns. That means no mess or cloud of dust when you empty it. Just drop the used bag into the trash and put a new one in the base—clean and simple.
- **4-stage cleaning:** Find, reach and eliminate messes with the combined power of 70X more suction*, multi-surface bristle brush, edge-sweeping brush, to devour dirt and dust bunnies, plus a microfiber mop pad to leave floors shiny and clean.
- **Super-smart mapping and navigation**: ClearView™ LiDAR sleekly hidden inside the robot quickly maps your home, avoids obstacles and cleans in neat rows, even in the dark.

**As compared to Roomba® 600 series robots*

A brilliant, everyday clean.

- **Get the right clean:** Choose from settings including vac only, mop only, or combo vac-mop, and rest easy as, unlike other robots, the Roomba® 105 Combo Robot won't mop rugs thanks to automatic carpet detection.
- **Fully custom cleaning:** Schedule and target rooms based on your daily routine and adjust the number of cleaning passes, levels of suction power, and amount of mopping solution pumped onto the microfiber mopping pad.
- **Easy-to-use Roomba® Home App:** Simply tap to set a custom clean, get time estimates, check on the filter life, or create keep-out zones to avoid specific areas.
- **Mopping convenience:** Leave floors beautifully cleaned thanks to the built-in mop with a micro-pump controlling water flow and keeping the mopping pad uniformly moist during cleaning. Use water or a compatible cleaning solution* and choose SmartScrub for 2x deeper scrubbing**.
- **3 easy ways to control**: Conveniently control your Roomba® robot by speaking to your preferred voice assistant-enabled*** devices, tapping the app, or pressing the robot's buttons.

**See https://homesupport.irobot.com/s/article/roomba-combo-cleanser for list of compatible cleaning solutions*

***With SmartScrub engaged, compared to the standard mop mode for IEC standards for coffee*
