 - | Franchise jobs 27,300

**Complete details on franchise employment can be found [here](#).

"We've seen yet another month where the labor market has shown no signs of slowing," said Ahu Yildirmaz, vice president and co-head of the ADP Research Institute. "Throughout the year there was significant growth in services except for an overall loss of jobs in the shrinking information sector. Looking at company size, small businesses finished out 2017 on a high note adding more than double their monthly average for the past six months."

Mark Zandi, chief economist of Moody's Analytics, said, "The job market ended the year strongly. Robust Christmas sales prompted retailers and delivery services to add to their payrolls. The tight labor market will get even tighter, raising the specter that it will overheat."

The January 2018 *ADP National Employment Report* will be released at 8:15 a.m. ET on January 31, 2018.

About the ADP National Employment Report[®]

The *ADP National Employment Report*[®] is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP[®], a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute[®], a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
