**Complete details on franchise employment can be found [here](#).

"The labor market continues to grow at a solid pace," said Ahu Yildirmaz, vice president and co-head of the ADP Research Institute. "Notably, manufacturing added the most jobs the industry has seen all year. As the labor market continues to tighten and wages increase it will become increasingly difficult for employers to attract and retain skilled talent."

Mark Zandi, chief economist of Moody's Analytics, said, "The job market is red hot, with broad-based job gains across industries and company sizes. The only soft spots are in industries being disrupted by technology, brick-and-mortar retailing being the best example. There is a mounting threat that the job market will overheat next year."

The December 2017 *ADP National Employment Report* will be released at 8:15 a.m. ET on January 4, 2018.

About the ADP National Employment Report[®]

The *ADP National Employment Report*[®] is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP[®], a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute[®], a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
