- | **Franchise Employment****
 - | Franchise jobs 23,300

**Complete details on franchise employment can be found [here](#).

"As we exit 2016, it's interesting to note that the private sector generated an average of 174,000 jobs per month, down from 209,000 in 2015," said Ahu Yildirmaz, vice president and head of the ADP Research Institute. "And while job gains in December were slightly below our monthly average, the U.S. labor market has experienced unprecedented seven years of growth that has brought us to near full employment. As we enter 2017, the tightening labor market will likely slow the growth."

Mark Zandi, chief economist of Moody's Analytics, said, "Job growth remains strong but is slowing. The gap between employment growth in the service economy and losses on the goods side persists. Smaller companies are struggling to maintain payrolls while large companies are expanding at a healthy pace."

The matched sample used to develop the *ADP National Employment Report* was derived from ADP payroll data, which represents 411,000 U.S. clients employing nearly 24 million workers in the U.S. The November total of jobs added was revised down from 216,000 to 215,000.

To obtain additional information about the *ADP National Employment Report*, including additional charts, supporting data and the schedule of future release dates, or to subscribe to the monthly email alerts and RSS feeds, please visit www.adpemploymentreport.com.

The January 2017 *ADP National Employment Report* will be released at 8:15 a.m. ET on February 1, 2017.

About the ADP National Employment Report[®]

The *ADP National Employment Report*[®] is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP[®], a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute[®], a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report. Development Methodology](#).
