Company Overview

Arthrex is a global leader in multispecialty minimally invasive surgical technology, scientific research, manufacturing, and medical education. More than 40 years ago, Arthrex pioneered the field of arthroscopy and sports medicine. Today, we develop more than 1000 new products and related procedures annually to advance minimally invasive orthopedic, trauma, spine, cardiothoracic, orthobiologic, and arthroplasty innovations worldwide. Arthrex also specializes in the latest 4K multispecialty surgical visualization and OR integration technology solutions. Through our long-standing commitment to innovation, Arthrex is leading the way in discovering clinical breakthroughs—like surgical visualization capabilities that enable surgeons to detect cancer cells that may have otherwise been missed*—and optimizing digital solutions to further support our customers and enhance patients’ lives.

*K241361. Arthrex, Inc., 2024.

Arthrex continues to experience unprecedented growth and demand for our products throughout the world; however, we remain a privately held company committed to delivering uncompromising quality to the HCPs who use our products, and ultimately, the millions of patients whose lives we impact.

Mission

Since its inception, Arthrex has been committed to one mission: Helping Surgeons Treat Their Patients Better®.

Arthrex has always remained a privately held company, which allows for the rapid evaluation of new technologies and ideas and provides the freedom to develop products and techniques that truly make a difference in people’s lives.

The medical significance of our contributions serves as our primary benchmark of success and will continue to be the legacy of Arthrex.

Corporate Strategy

In our efforts to make less invasive surgical procedures simple, safe, and reproducible, we are strategically focused on perpetual product innovation through scientific research, surgeon collaboration, and medical education.

Within a vibrant, fast-paced, and dynamic atmosphere, our experienced team of dedicated professionals represents a shared passion and commitment to delivering uncompromising quality to the health care professionals (HCPs) who use our products and the millions of patients whose lives we impact.

1 Arthrex global headquarters in Naples, Florida, is a sprawling, university-style campus that serves as an education destination for HCPs around the world.

2 Scientific research is pivotal to developing groundbreaking products, procedures, and technologies. At Arthrex, our global research team works hand-in-hand with development teams and leading surgeons and medical institutions to ensure our products and techniques are scientifically supported for safety and effectiveness.

3 Arthrex is mindful of the effect our manufacturing and corporate activities have on the environment and is committed to robust global sustainability initiatives.

4 Our core value is **Making People Better**. From contributing to truly meaningful work to providing growth opportunities for Arthrex employees and enhancing their lives to giving back to our communities, this value represents our cultural purpose.

5 Our global logistics center in Fort Myers, Florida, distributes, on average, more than 4,000 packages per shipping day domestically and more than 370 packages per day internationally. Eighteen international distribution centers ensure our products are delivered in a timely manner to our customers.

6 Arthrex has a global presence with regional head offices in Munich, Germany, São Paulo, Brazil, and Singapore, and additional subsidiaries and locations throughout Latin America, Europe, and Asia-Pacific.

7 Arthrex is committed to manufacturing in the United States, assembling more than 87% of products across three manufacturing facilities in Florida, South Carolina, and California.

8 Studio X on the global headquarters campus features the most advanced, state-of-the-art media production technology, furthering our investment and commitment to providing the most innovative medical education resources for HCPs around the world.

9 Arthrex provides unparalleled, hands-on training and support for HCPs. In the lab, a low surgeon-to-staff ratio allows the team to share their deep knowledge of surgical best practices and Arthrex instrumentation and procedures while surgeons explore and master surgical concepts and techniques.

10 Delivering a one-of-a-kind learning environment, Arthrex global headquarters is skillfully designed to deliver an immersive and engaging medical education experience for visiting HCPs.

11 Arthrex has more than 65 agencies in the US and knowledgeable and highly skilled sales teams around the world to support our customers. Arthrex sales representatives go through a comprehensive training program that includes a three-year didactic and clinical pathway to become Technology Consultants.

Arthrex Value

Shaping the Future of Medical Care

At Arthrex, our mission drives everything we do. Our commitment to excellence is embodied in the Arthrex Value, which is built on five core pillars: company culture, innovation, medical education, representation, and quality. These pillars guide our efforts to advance care and improve patient outcomes worldwide.

Company Culture

Company culture at Arthrex is rooted in collaboration, integrity, and respect. We create an inclusive and supportive work environment where every team member is valued and encouraged to contribute their unique talents. Our culture promotes innovation, teamwork, and a shared commitment to our mission and values.

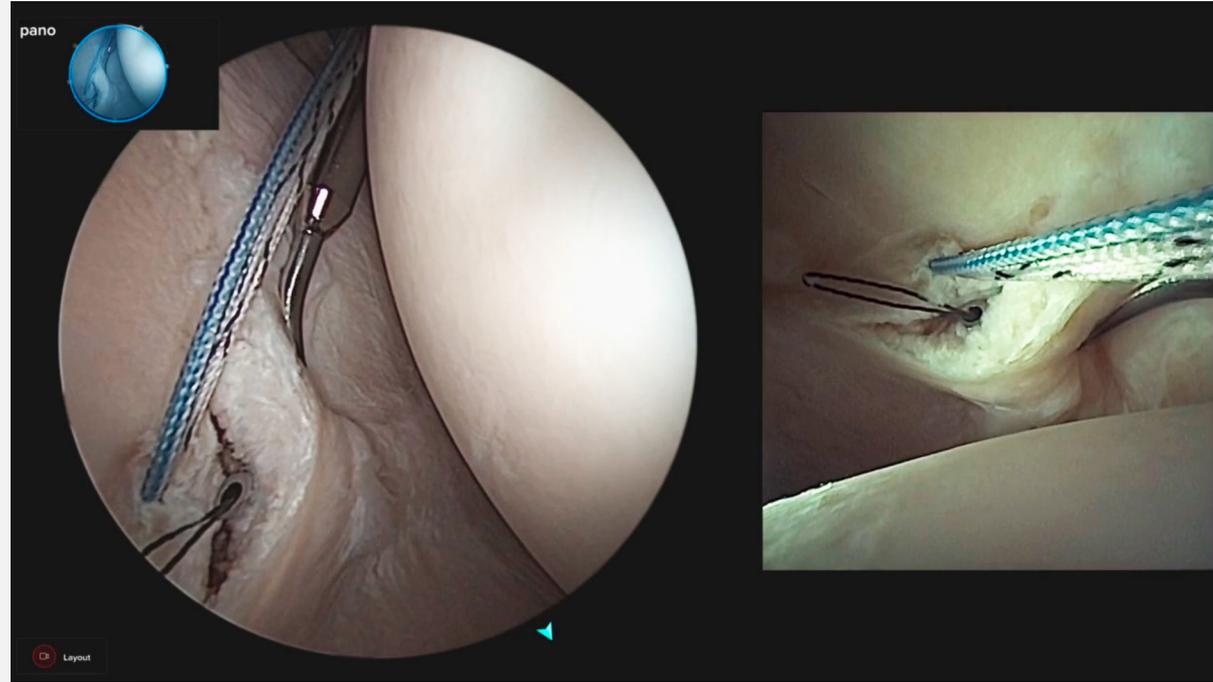

6

Innovation

Innovation drives us to develop cutting-edge products and techniques that revolutionize medical care. Our relentless pursuit of innovation ensures that we remain at the forefront of medical advancements, entering new markets that include trauma, endoscopy, spine, aesthetics, cardiothoracic, cancer illumination, neurosurgery, and wound healing. This commitment provides surgeons with the tools they need to deliver the best possible care to their patients.

Arthrex boasts numerous global ArthroLab locations, with ongoing lab expansions, and offers a robust medical education curriculum.

Representation

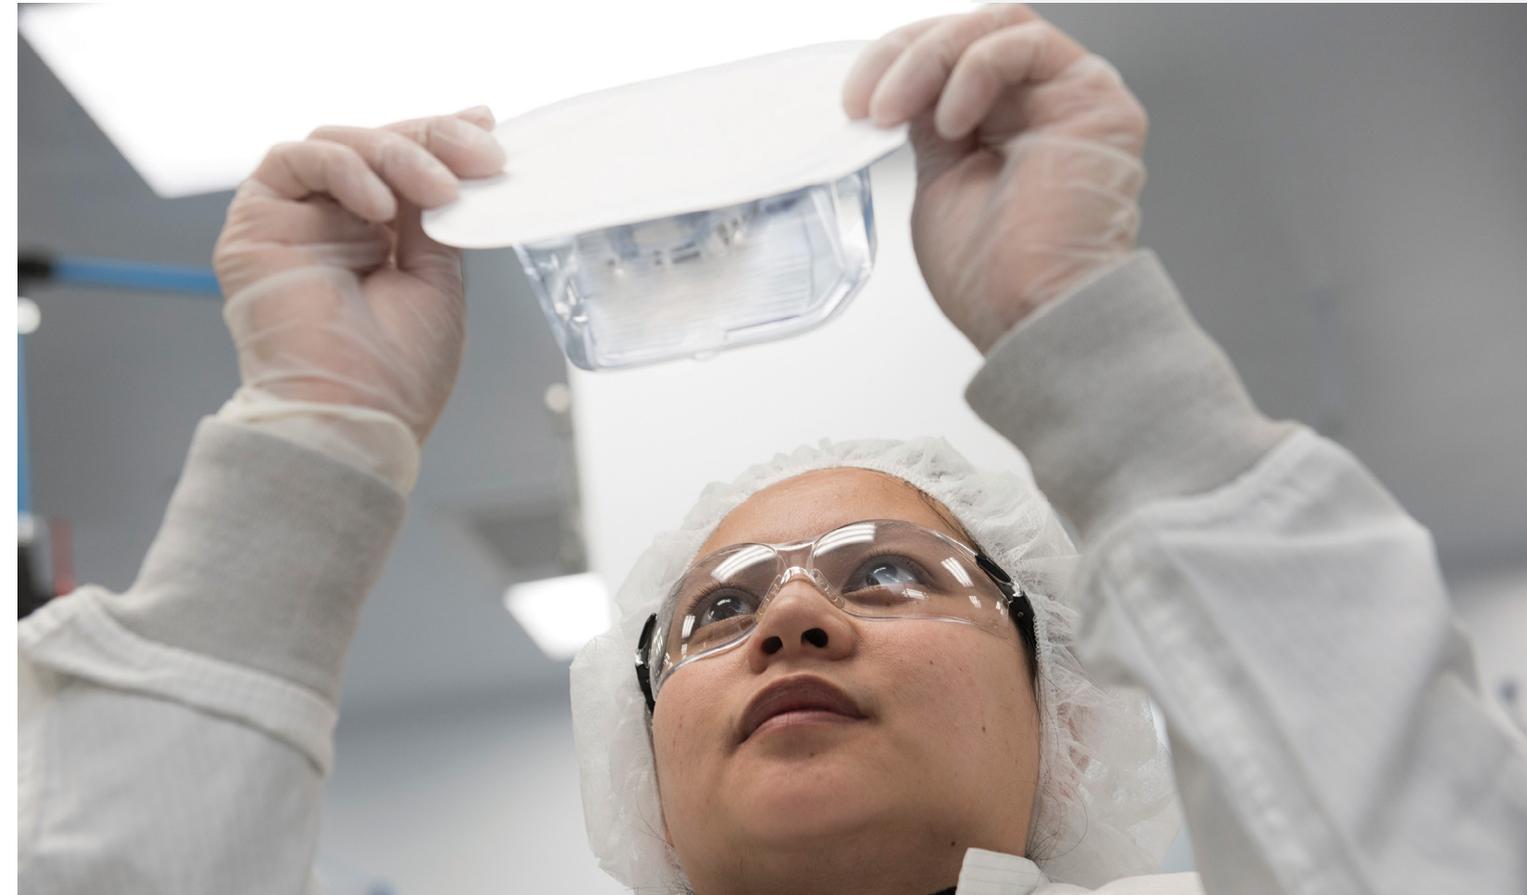

Representation is a key to our service model. Our agencies, distributors, and highly trained Technology Consultants provide personalized guidance to HCPs, ensuring effective use of Arthrex products. With agency and lab locations throughout the US and subsidiaries and distributors in more than 80 countries, we are continuously enhancing our local presence and extending our global reach. Providing extensive, hands-on support helps to optimize surgical outcomes and enhance the overall patient experience.

Quality

Quality is an uncompromising standard at Arthrex. From the initial design phase to the final product, we adhere to the highest quality standards to ensure the safety and efficacy of our solutions. Our commitment to quality is reflected in our rigorous testing processes and our dedication to continuous improvement.

600+
Global Quality Assurance
and Control Employees

Our unwavering commitment to these pillars defines who we are and fuels us in fulfilling our mission. As we continue to shape the future of health care, Arthrex remains dedicated to upholding the values that have made us a trusted leader in the industry.

Global Presence

The Arthrex global network extends from the United States to every corner of the world, ensuring customers feel our presence and support no matter where they are.

Our teams are strategically positioned in four regional head offices: Naples, Florida (US); São Paulo, Brazil (LATAM); Munich, Germany (EMEA); and Singapore (APAC). There are 34 subsidiaries based within these regions, allowing us to provide localized expertise and dedicated service. This strategic distribution ensures that Arthrex remains a trusted partner worldwide.

Global Commitment to Excellence
At Arthrex, our global ethos of excellence drives innovation, quality, and customer satisfaction. Our collaborative spirit and strong regional partnerships foster innovation and ensure best practices are shared worldwide, keeping us at the forefront of medical advancements.

REGIONAL HEAD OFFICES

Europe, Middle East, and Africa (EMEA)

Munich, Germany

Located in the Freiham district, the state-of-the-art Munich facility employs nearly 600 professionals and includes a modern ArthroLab™ training center. The Munich office is pivotal in supporting Arthrex’s mission by providing comprehensive medical education, engineering, product management, and customer service to health care professionals (HCPs) across the EMEA region.

Asia-Pacific (APAC)

Singapore

The modern Arthrex facility in Singapore supports the growing needs of HCPs across Asia. It offers comprehensive medical education, engineering, product management, and customer service, ensuring Arthrex’s innovative solutions and high standards of care are accessible throughout the region.

Latin America (LATAM)

São Paulo, Brazil

This modern facility supports HCPs with comprehensive medical education, engineering, product management, and customer service. It features an ArthroLab training center and plays a vital role in advancing medical care and enhancing patient outcomes across Latin America.

Naples Campus

Arthrex global headquarters—located in Naples, Florida—sits on a sprawling 80-acre university-style campus where visitors will find a vibrant atmosphere of rapid product innovation, scientific research, and surgeon collaboration. Our modern educational facilities represent our commitment to surgeon education and the private company values on which Arthrex was founded.

Arthrex One

Arthrex One, an 879,000-square-foot, six-story building, accommodates most Naples campus employees and provides ample event space in its spacious ground-floor auditorium and numerous meeting rooms.

With nearly 15,000 square feet of uniquely designed meeting and exhibit space, Arthrex One features state-of-the-art multimedia systems and modular spaces for medical education presentations and panel discussions. Surgical demonstrations can be performed and transmitted live into the auditorium or remotely around the world from the virtual OR.

Upon request, the Arthrex Meetings and Events team can efficiently turn over the auditorium into a first-class dining room for evening indoor dining. The exhibit and product demonstration space on the ground floor allows visitors to touch products and learn about their features and benefits. Equipped with the latest in 4K imaging, integration, and resection technology, the nearby Synergy Suite enables health care facilities to envision greater efficiency and enhanced patient experiences.

Arthrex One accommodates most Naples campus employees and provides ample event space along with an impressive exhibit area for product demonstrations.

Arthrex global headquarters sits on an 80-acre, university-style campus in Naples, Florida. Our advanced instructional facilities represent our commitment to medical education.

Innovation hotel delivers a fully immersive educational experience with 169 well-appointed, modern guest rooms, a wide range of meeting spaces, and thoughtful amenities.

Innovation hotel guests can download the hotel app to enable easy check-in, wellness center and parking access, and requests for lab services.

Innovation Hotel

Innovation hotel was designed to deliver a one-of-a-kind, fully immersive educational experience to visiting HCPs and Arthrex business guests.

Located directly on campus, the hotel features 169 well-appointed, modern guest rooms, a wide range of meeting spaces, and thoughtful amenities presented with uncompromising quality. Visitors have access to several smaller event spaces throughout the hotel, including six private meeting rooms, the greenhouse atrium, multiple dining outlets, and an outdoor courtyard and patio.

In the lobby, the Arthrex History Gallery allows visitors to explore our rich history and dedication to surgical product innovation and medical education over the last 40+ years. Nearby, ArthroMan, an interactive life-size human skeleton, brings innovative Arthrex products and surgical procedures to life in a vivid and engaging 3D form.

The Arthrex Experience

The Arthrex Experience (AX) is defined as the impact of the clinical knowledge, relationships, and trust gained through the engagement of Arthrex innovation, people, and culture. An Arthrex Experience provides a comprehensive overview of our foundational pillars, including medical education, innovation, and research.

The AX team is responsible for the cumulative visit experience of surgeons, health care leaders, administrators, agency partners, and Arthrex business guests, whether onsite or virtual. The AX team strategically collaborates with other Arthrex business teams to coordinate an agenda customized to effectively accomplish the objective of the visit and maximize the full educational value of the Arthrex campus.

Studio X

Furthering our investment and commitment to providing the most advanced medical education resources for the global health care community, Studio X is the newest addition to our global headquarters in Naples, Florida. This 24,000-square-foot facility features the most advanced, state-of-the-art media production technology.

Studio X represents the perfect intersection of science and art, enabling us to introduce the latest in Arthrex innovation and techniques with interactive and immersive medical education resources.

Studio X offers three distinct areas for video content creation:

Holodeck Extended Reality (XR) Stage

- › Combines multiple high-resolution motion-tracking cameras, LED walls, and an LED floor to create an interactive and spatial experience for presenters and audiences

Surgical Studio Suite

- › Equipped with the latest generation of Synergy technology to enhance the visual quality of surgical techniques as well as demonstrate new workflow and procedural efficiencies

Virtual Production Stage

- › Surrounds presenters with a 100-ft LED volume wall; towering over 17 ft, this instantly transformable backdrop creates a revolutionary experience that harnesses the same capture and lighting techniques used in motion-picture production studios

Studio X features the most advanced, state-of-the-art media production technology for creating interactive, immersive resources. It also houses a dedicated strategic planning and design center for hospitals and ambulatory surgery centers (ASCs).

In creating an experience that elevates and inspires, we are pushing the boundaries of science and creativity.

Arthrex Surgery Center Innovation

Arthrex is known as a pioneer of minimally invasive products and techniques that have enabled surgical cases to be performed safely in outpatient and ambulatory settings. Arthrex Surgery Center Innovation (ASC X) is committed to aiding in the planning, design, construction, and marketing of both new and existing ambulatory surgery centers (ASCs) and hospitals. In addition to its comprehensive line of multispecialty solutions, ASC X offers access to an experienced network of industry-leading partners to ensure that surgical services teams have access to the latest minimally invasive product and technology innovations.

In the Studio X Holodeck extended reality stage, visiting health care leaders can use advanced software to design operating and procedure rooms and explore the future state of Arthrex minimally invasive technologies. The Holodeck's LED walls and floor allow visitors to view and configure OR layouts from multiple perspectives in real time, providing an immersive and interactive educational experience.

Leading the Way in Innovation

Arthrex is strategically focused on making less invasive surgical procedures simple, safe, and reproducible. Globally, our industry-leading innovation is driven by a deep commitment to transformational product development, comprehensive surgeon support, and positive surgical outcomes.

Working collaboratively with surgeons and medical institutions worldwide, Arthrex delivers industry-leading, science-driven innovation at a rapid pace in a competitive business environment.

1,000+
Products Developed Annually

1,700+
Patents and Counting

Arthrex medical education prioritizes surgeon needs with industry-leading laboratory facilities and training led by world-class surgeon faculty and a medical education staff with extensive orthopedic practice and research experience.

Arthrex offers customizable medical education courses, which include comprehensive and tailored hands-on surgical skills training.

Global Medical Education and Surgical Skills Training

An Unsurpassed Educational Experience

Characterized by our dedication to Helping Surgeons Treat Their Patients Better®, Arthrex provides unparalleled, hands-on training and support for HCPs and agency partners. Each year, Arthrex hosts thousands of attendees from around the world for both in-person and virtual training in our cutting-edge medical education facilities.

ArthroLab™ Facilities

Surgical skills courses are hosted in our industry-leading laboratory facilities at our global headquarters in Naples, Florida, and around the world. ArthroLab learning experiences provide the optimal opportunity to experience our dedication to innovation and medical education.

ArthroLab Naples and ArthroLab Munich feature a combined total of more than 150 workstations, for hands-on cadaveric training focused on the safe and effective use of Arthrex products and procedures. The adjacent Product Showcase and Synergy Operating Room Integration Suite allow visitors to learn even more about Arthrex products, technology, and related surgical techniques.

“

Our skilled teams are dedicated to providing the finest medical education experience with an emphasis on hands-on learning in our ArthroLabs.

Christopher Adams, MD
Senior Vice President, Medical Affairs

With several hundred years of collective experience, the Arthrex Medical Education team is committed to providing the finest educational experience focused on the safe and effective use of Arthrex products and techniques.

Medical Education Opportunities

Our dedicated staff of orthopedic surgeons and professionals provide an unparalleled educational experience. As a worldwide leader in minimally invasive surgery, our training spans the globe.

Courses and Symposiums

Providing in-depth didactic and hands-on skills training on safe and effective use of Arthrex products and techniques

OrthoPedia.com

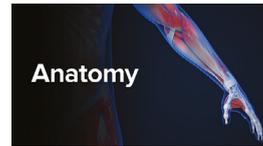

Your Trusted Resource for Orthopedic Knowledge

OrthoPedia is the world's most advanced and complete online platform providing orthopedic surgery education for health care professionals (HCPs) and patients. This dynamic and comprehensive learning experience is uniquely designed to help HCPs expand their knowledge of orthopedic surgery and musculoskeletal medicine.

With custom dashboards for clinicians and academics, this open-access website includes videos and animations incorporating in-depth anatomy and pathology overviews,

surgeon-hosted discussions, data and literature reviews, technique pearls, and more.

In addition, the OrthoPedia Patient portal provides 3D animations reviewing anatomy, common orthopedic injuries and musculoskeletal conditions, and potential treatment options to support surgeons' patient education efforts.

OrthoPedia is uniquely designed to help HCPs achieve their medical education goals.

Each Arthrex Technology Consultant masters more than 150 innovative, unique procedures, separating us from others in the industry.

Agency Representation

Arthrex has 10 regions across the US with more than 65 agencies dedicated to advancing care through hands-on education and continuous support. Exemplifying a standard of excellence through exceptional technology consulting, customer service, medical education, and innovative solutions, Arthrex agencies are dedicated to fulfilling the Arthrex mission.

Through the Technology Consultant Program, TCs have a unique opportunity for advanced, hands-on training and a career path unlike any other.

Technology Consultant Program

At Arthrex, thousands of highly trained Technology Consultants (TCs) represent our agencies and distributors. To ensure customers receive the highest level of service and product support, Arthrex agency representatives complete an exhaustive training program that prepares them to provide product support and feedback to surgeons and their practices.

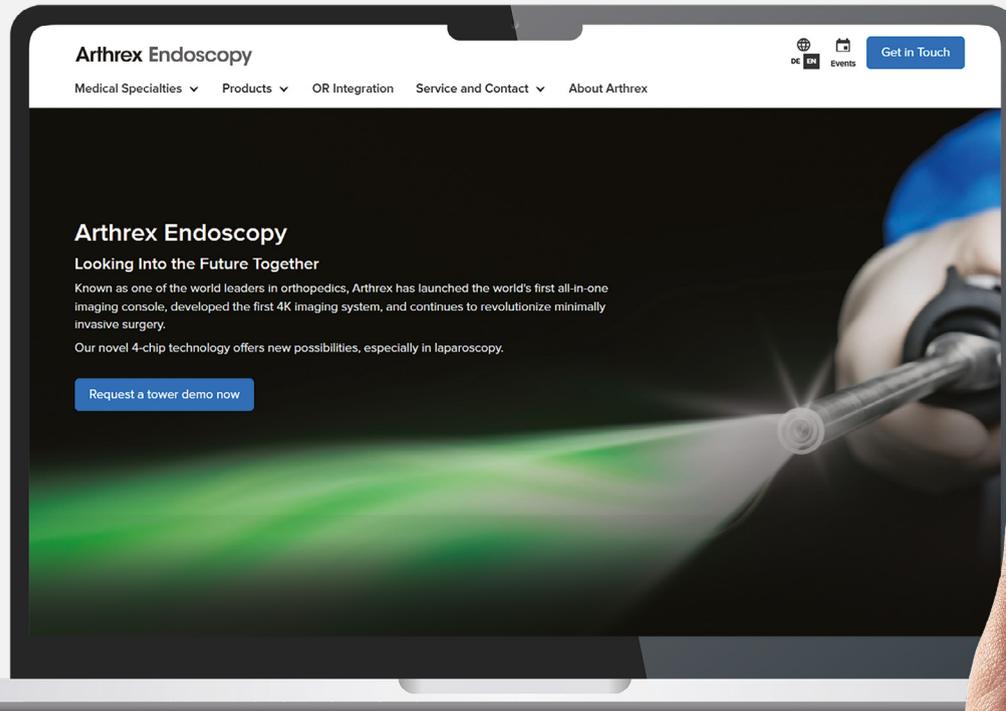

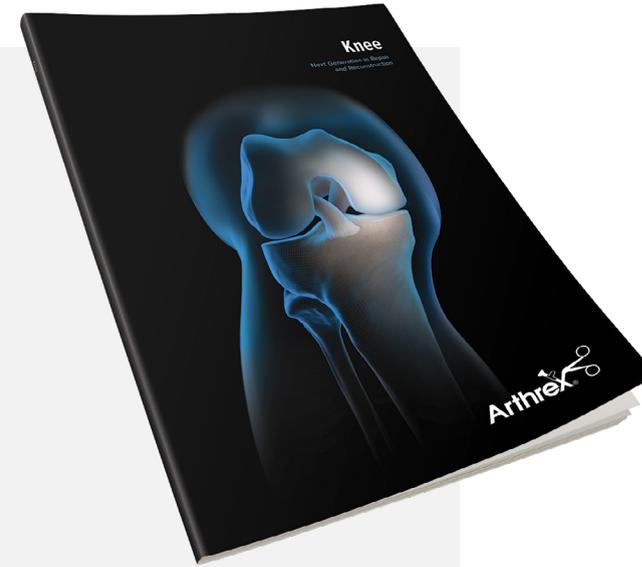

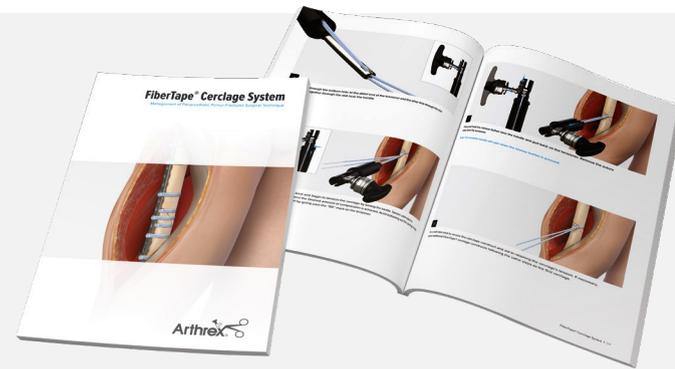

Through this pathway, TCs receive hands-on wet lab training in anatomy, biomechanics, surgical techniques, and intraoperative problem-solving; background knowledge of product design, manufacturing, quality assurance, and collection of surgical outcomes data; and more than 1000 hours of OR participation or training. Arthrex employees are committed to equipping TCs with the support, knowledge, and skills needed to effectively showcase Arthrex innovation.

Empowering HCPs With Advanced, Hands-on Education

Working firsthand with our knowledgeable and highly skilled agency representatives, HCPs receive premier access to local educational opportunities.

Arthrex agencies are committed to providing HCPs with the highest quality medical education, service, and product support in the industry, carrying out the Arthrex mission of **Helping Surgeons Treat Their Patients Better®**.

Marketing

Arthrex provides HCPs and their patients with stunning educational graphics, illustrations, animations, videos, and other resources to help them visualize our products and techniques. Communicating the evidence-based science first reflects our promise of safety, reliability, and trust.

From strategic planning and research to creative design and development, our dedicated and highly skilled Marketing and Communications teams are focused on delivering impactful campaigns that drive engagement, resonate with our audiences, and support our mission of Helping Surgeons Treat Their Patients Better®.

Global Research

Arthrex and our global research team have a vision of uniting impactful scientific evidence with innovations that instill trust with surgeons and their patients. Our culture of research excellence is rooted in extensive internal testing of new technologies and techniques and collaborating closely with development teams and leading surgeons and medical institutions.

We are committed to providing the scientific foundation and validation of the safe and effective use of our products and procedures. This responsibility involves supporting product management and engineering teams with prototype testing, publishing scientific literature for product launches, and conducting postmarket surveillance of patient outcomes. Our unwavering commitment to quality and our corporate mission allows us to make a meaningful impact on the lives of surgeons and their patients worldwide.

“

Timely, scientific evidence drives our development of innovative technologies, demonstrating a culture of research excellence.

Larry Higgins, MD, MBA
Vice President, Strategic Development

185 Unique Research Collaborators
In FY24 alone, Global Research partnered with 185 unique research collaborators, showcasing our commitment to advancing science in many specialties.

Customer Service

Arthrex achieved certification under the prestigious Service Capability & Performance (SCP) Standards, recognizing our customer support organization for delivering top-quality service. This certification, created by the consulting firm Service Strategies, in cooperation with approximately 50 leading service and support organizations from around the world, sets the global benchmark for service excellence. By adopting SCP standards, Arthrex commits to providing exceptional service, enhancing the quality and effectiveness of our operations, and continuously improving through annual audits. This milestone underscores Arthrex's dedication to being a leading service provider in the medical device industry.

Product Development

Our dedication to quality is demonstrated through a science-driven approach to product and technique development, rigorous research standards, stringent quality assurance measures for manufacturing, and cutting-edge facilities and resources.

Product Management

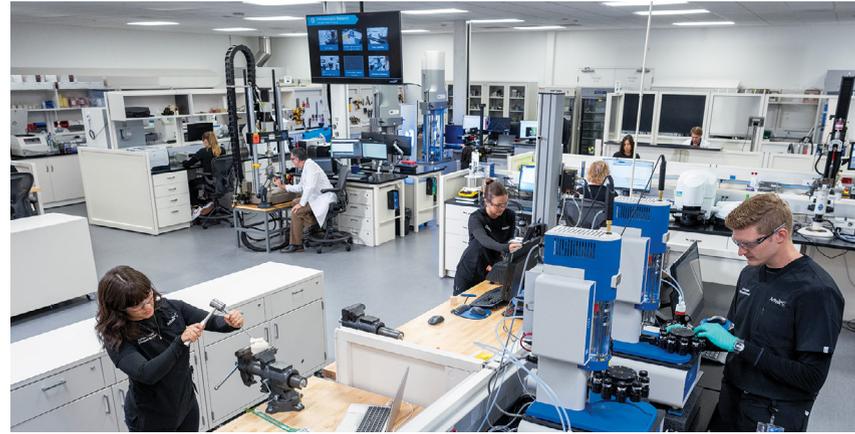

Our product managers drive industry-leading innovation, expertly guiding the product development lifecycle from inception to commercialization. They achieve this through strategic and collaborative partnership with our world-class engineers and surgeon customers.

Engineering

Arthrex engineers are at the forefront of advancing science through product development, seeing products through from design to production and launch.

Rapid Prototyping

At our Naples campus, the Rapid Prototyping and Manufacturing Research team showcases rapid 3D-printed prototypes for visitors and gives them direct insight into Arthrex manufacturing technologies.

Our Product Development team advances science through the design and development of products that help surgeons and improve patients' lives.

Through strategic collaboration with engineers and surgeons, our Product Management team leads the product lifecycle from inception to commercialization.

Arthrex is committed to manufacturing in the United States, with more than 87% of products assembled in the USA.

Manufacturing

From raw materials to finished products, our commitment to quality is demonstrated in every step of the manufacturing process. Arthrex has manufacturing facilities in Florida, South Carolina, and California.

Exhibits and Congresses

One World. One Team.

Through exhibits and congresses, Arthrex connects with customers and agencies to educate, build relationships, and share the latest innovations in products and services. In this setting, exhibit visitors learn about our latest innovations and extensive product portfolio and engage with our knowledgeable staff.

The Arthrex exhibit experience is comprised of five main elements:

- › Educating and connecting with visitors
- › Brand presence through artwork and corporate branding
- › Product displays for touch and demonstration
- › Feature display of a highlight or experience
- › Visual interest through video, attraction, and movement

Attending exhibits and congresses provides an ideal opportunity for Arthrex to educate, build relationships, and create brand recognition with our customers.

Expanding Our Impact

Looking ahead, Arthrex is poised for significant global expansion and innovation. We are breaking new ground in markets like trauma, endoscopy, spine, aesthetics, cardiothoracic, cancer illumination, neurosurgery, and wound healing. Also, exciting plans are in motion for Arthrex West, a second headquarters outside of Denver, Colorado. This new hub will enable us to elevate our service to surgeons and agency partners in the West region of the US, providing even greater opportunities for collaboration and innovation. As a global leader, Arthrex is continuously expanding and innovating across regions, including EMEA, to drive excellence and growth.

Development of an Arthrex office in the greater Denver area is underway.

Our relentless drive for innovation ensures we deliver cutting-edge solutions and unparalleled support to health care professionals worldwide. At Arthrex, we are committed to pioneering innovative solutions that enhance patient care and improve surgical outcomes. Together, we're not just enhancing patient outcomes—we're revolutionizing the future of medicine.
