CUSTOMER OVERVIEW

Based in Toronto, Brook Restoration specializes in commercial and residential restoration projects across Ontario. Founded in 2000, the company works on a multitude of jobs each year covering a variety of applications including healthcare, religious and educational.

With a large footprint across the province, leadership at Brook Restoration needed a solution to ensure each crew has the assets and equipment they require to make projects better, more efficient, economical and safe. Partnering with Brafasco/HD Supply for distribution, Bosch is a total asset solution, providing both equipment and Bluehound services for Brook Restoration.

Bosch Bluehound uses Bluetooth® tags and a cloud-based platform to gather data at the asset level with minimal manual intervention. The crews at Brook Restoration tag their power tools and track their location digitally – this prevents duplicate asset purchases and boosts productivity as equipment goes from jobsite to jobsite. Hear from the team on the main benefits of partnering with Bosch.

PROJECT INSIGHTS

FULL TRANSPARENCY

“In terms of the Bosch Bluehound technology, it allows us to have full visibility of our tools, whether they are in use or in idle. We’re able to maximize the efficiency of our tools when we distribute them.” – Eric Dimech, Logistics Manager, Brook Restoration

QUALITY ASSETS FOR OPTIMIZED PRODUCTIVITY

“Time is money. If a tool goes down, the operator can’t perform their work. Bosch is offering an extended warranty to Brook Restoration. We offer up to a three-year, hassle-free warranty on corded power tools. On cordless products, we’ve extended the warranty to five years on the tool and three years on the battery to make sure they can rely on those tools, no questions asked. Our goal is to keep downtime to a minimum and productivity as high as possible.” – George Ireland, Bosch National Sales Manager, Industrial Channel

COMPETITIVE IN THE MARKETPLACE

“For Brook Restoration, this partnership and the access to their assets allows them to take on more restoration projects than the competition across the Canadian market.” – Bergum Matthew, Director, Bosch Canada
