

Driven by Our Promise

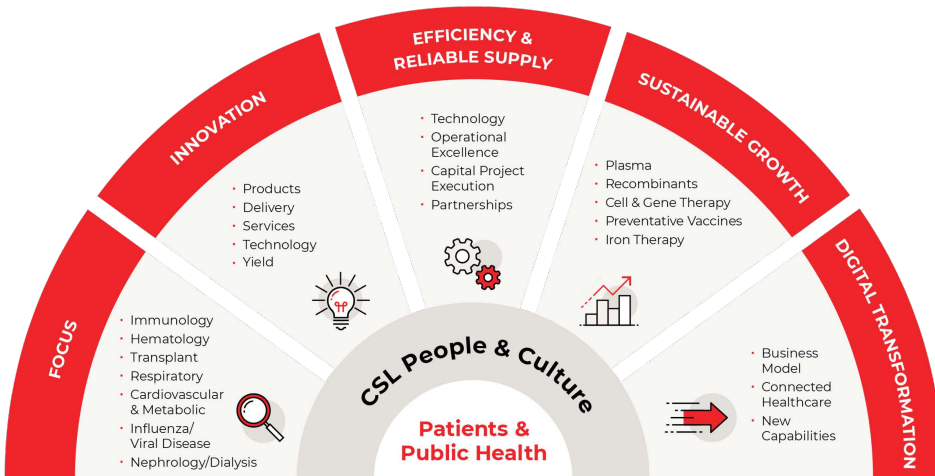

Over a century ago in Melbourne, Victoria, Australia, we made a promise to save lives and protect the health of people who were stricken with a range of serious and chronic medical conditions.

Today, as a leading global biotech company, that same promise has never been stronger. We focus on rare and serious diseases, influenza vaccines, iron deficiency and nephrology. Our unique combination of commercial strength, R&D focus and operational excellence enables us to identify, develop and deliver innovations so our patients can live life to the fullest.

OUR BUSINESSES

OUR 2030 STRATEGY

We compete on the global stage as one of the largest and fastest-growing protein-based biotechnology businesses and a leading provider of influenza vaccines.
