Good Morning,

Although I'm unable to join you in person today, I am pleased to congratulate Lam Research as you celebrate the opening of Building G. This \$65 million project marks an important investment in Oregon innovation and strengthens the foundation for future growth on Lam's Tualatin campus. Thank you to everyone who made this milestone possible.

Lam Research is a key leader in the international semiconductor supply chain, and places Oregon at the forefront of innovation in this critical industry. For more than three decades, Lam has drawn on our region's deep bench of technical expertise, anchored a world-class research and development presence, and helped create the thriving innovation ecosystem that defines Washington County today.

Building G builds on that foundation by preparing the Tualatin campus for future growth in an increasingly demanding industry, supporting good-paying jobs, and strengthening the region's advanced manufacturing economy.

As your representative in Congress and a member of the House Science, Space, and Technology Committee, I remain committed to ensuring that federal investments continue to support research, workforce development, and economic growth across our region.

Thank you for the opportunity to be part of this day and for your continued investment in Oregon. It is an important step forward for Lam, for the Tualatin campus, and for the future of advanced manufacturing in our state.

As always, it is an honor to serve you in the United States Congress.

Sincerely,

Andrea Salinas

Member of Congress
