

Sudhir Mehta

Global Vice President, Optra Engineering and Product Management

Sudhir Mehta is global vice president of Optra engineering and product management for Lexmark International, which he joined in June 2021. An accomplished leader with deep international experience, Mehta has experience managing technology efforts across areas including partnerships, security, cloud, Internet of Things (IoT), user interface/user experience (UI/UX), artificial intelligence/machine learning (AI/ML) and modern apps.

He currently spearheads Lexmark’s engineering, product management and services enablement – for edge, IoT and cloud. His team drives engineered IoT solutions with best-in-class, modern technologies deployed in the cloud with systemic innovation, predictive capabilities, automated actions and anything-as-a-service (XaaS) enablement.

Prior to Lexmark, Mehta was global vice president for product management, modern architecture and UI/UX at Unisys Corporation. Before Unisys, Mehta was responsible for spearheading Symantec’s cloud strategy with software-as-a-service (SaaS) products and partner integrations, leading to the acceleration of Symantec’s security SaaS solutions. He also directed product management for global systems integrators and Norton’s OEM partnerships. Mehta has held previous leadership roles with Hewlett-Packard, Nokia and Wipro.

A member and contributor to the Forbes Technology Council, Mehta earned a bachelor’s degree in electronics engineering from the National Institute of Technology in Allahabad, India. He lives in Silicon Valley.
