

### WEDNESDAY, JULY 12, 2017 – 5 AM WEATHER FORECAST

The radar shows an area of sprinkles off to our east around NYC moving away from us, and patchy clouds should thin out a bit this morning, leading to more sunshine than clouds as it remains rather humid. Clouds will gradually increase again around lunch time with a slight chance for a shower or sprinkle this morning, followed by a 40 percent chance for a shower or storm after 2 PM today as the high reaches 90. Winds will be west-southwest around 5 mph, with a few gusts to 12 mph. Tonight will stay muggy with a mainly evening shower or storm possible. Tomorrow will be hot and rather humid with a high in the middle 90s and a heat index around 100. There will be a shower or storm possible, mainly later in the afternoon. A front will approach Thursday night, bringing a higher likelihood of showers and storms from Thursday evening through Friday evening. Rain amounts of 0.50-1.50 inches will be possible through Friday night as the front slowly drags through the area.
