

### SATURDAY, AUGUST 8, 2020 – 6 AM WEATHER FORECAST

Friday looks to start off quiet with some low clouds and it will be just slightly damp on the course first thing from a few overnight showers and quite a bit of dew. Beyond the early morning hours, steadily brighter, drier conditions will begin to overtake Woodmont as the last of a long stalled weather boundary weakens and shifts away from the DC area. Behind this shift more stable weather will dominate, as well as more sunshine and hotter temps. While an isolated shower can't be completely ruled out during the day Saturday, by the evening we do expect completely dry conditions. Sunday is set to feature abundant sunshine and very little wind and this combination along with high humidity will allow the Heat Index to push into the mid to upper 90s during the better part of Sunday afternoon.
