

TUESDAY, AUGUST 11, 2020 – 6 AM WEATHER FORECAST

As advertised low clouds and fog developed a few miles inland over the Coquille Valley and more low clouds are hanging just offshore with Bandon trying to stay in between. Therefore temps have been allowed to cool down into the lower 50s with the inland deck trying to slip in our direction. As the sun rises the fog to our east will burn off first over the next couple of hours and it will be the low cloud deck offshore that we'll still be watching mid to late morning to make sure it stays out over the Pacific. Temps will eventually warm up into the mid 60s once again with north winds gradually increasing by this afternoon. The good news is that the wind for today will not be as strong as yesterday with sustained speeds in the 12-18 mph range with gusts 18-24 mph at times this afternoon. Winds may become calm late tonight and it is Wednesday morning's start that has a better chance of low clouds and fog to be around Bandon. Otherwise Wednesday afternoon's wind forecast looks similar to today or just a little stronger with gusts more like 24-26 mph. And the wind outlook for Thursday and Friday is right now aiming to head back towards Monday's levels (high gust yesterday was 29 mph).
