

THURSDAY, AUGUST 13, 2020 – 6 AM WEATHER FORECAST

Less low clouds and fog have formed inland as expected, so we are looking at mainly sunny skies pretty much all day today. Temps starting out around 54 degrees will warm up around 10 degrees by early this afternoon. Northerly flow today will be more noticeable this morning than it was early yesterday morning as winds are anticipated to be stronger by this afternoon with speeds of 15-20 mph and gusts near 30 mph. Dewpoints will be a little lower today spending more time below 50 degrees than they have been, so conditions may feel just a touch drier today. However as a ridge to our southeast builds in across Oregon this weekend, dewpoints will climb back into the 50s tomorrow afternoon when temps have a pretty good chance at reaching the upper 60s. North and northeast winds on Friday will be about as strong as today under lots of sunshine. The warming trend reaches its climax on Saturday when highs are forecast to be in the 70s thanks to less winds that switch from the north to the southwest. Some high clouds and maybe even some smoke could mix with our sunshine on Saturday with highs pushing past the century mark well inland along I-5. Then we'll be waiting to see what time the low clouds and fog with the California marine layer makes its way to Bandon on Sunday.
