

WEDNESDAY, SEPTEMBER 16, 2020 – 6 AM WEATHER FORECAST

Dewpoints came up to around 50 degrees last night, but the wind laid down enough to allow temps to drop into the lower 50s this morning. The good news is we are still anticipated to reach the 70s this afternoon as our sunshine once again mixes with some high altitude smoke. Southwest to south winds today will increase as the day wears on with a high gust up around 20 mph this afternoon and that southerly flow will also increase the humidity with dewpoints climbing through the 50s. We may actually see a couple of fair weather clouds over Long Island today, then tonight we'll see some more clouds build across our area. Temps and dewpoints should be close to 60 degrees to start Thursday with a little less south and southwesterly wind tomorrow. Mainly sunny skies early Thursday will give way to increasing clouds in the afternoon when we top out in the upper 70s. There is a 20% risk of a shower or storm Thursday afternoon, but if we are going to see any precipitation it would be more likely Thursday night into Friday. A subtle cold front will sneak through by around midnight Thursday night ushering in a cooler northerly flow and with the combined cloud cover through at least the first half of Friday, temps will spend most of the day in the 60s with occasional sprinkles possible. Blustery north and northeast winds stay with us from Friday into Saturday as high pressure clears the skies out for the weekend with very Fall like temperatures expected.
