

FRIDAY, MAY 7, 2021 – 12 PM WEATHER FORECAST

Dewpoints are plummeting to our northwest to begin this afternoon already in the 50s across central Florida and in the 60s very close to Seminole. Look for our dewpoints to crash after 2 PM falling through the 60s. Even though our humidity will be decreasing as this cold front passes through, there will still be a brief 40% chance of a shower or storm this afternoon from 2 PM on, however by 5 PM the threat moves away to our south as clearing skies settle in for tonight. After starting off in the upper 60s to low 70s Saturday morning, highs will once again be back in the 80s - but this time with very comfortable humidity as dewpoints hang close to 60.
