

TUESDAY, JULY 27, 2021 – 5 AM WEATHER FORECAST

After a comfortable start in the 60s, strong July sunshine this morning will cause temps to soar to up around 90 degrees by early afternoon. Light winds this morning will aid in that quick warm up, however winds this afternoon will start pushing onshore from Long Island Sound and that should help temper the heat this afternoon. Dewpoints in the low 60s may dip into the upper 50s midday before rising through the 60s later on today thanks to that southerly flow that could gust in the teens. Clouds will begin bubbling up by this afternoon as well in advance of an approaching cold front. There will be a 20% chance of a shower or storm this afternoon, however the 40% threat doesn't really begin until 8 PM with the best chance at 60% coming tonight. Like Sunday night, rainfall amounts tonight will vary as the activity will be scattered in nature. A shower cannot be ruled out on Wednesday, but overall most of the day should feature just more clouds than sun and be cooler as well.
