

### FRIDAY, JULY 30, 2021 – 5 AM WEATHER FORECAST

From 4 PM to 10 PM Thursday we ended up getting just over 1.50" of rain with the stubborn showers and storms that hugged our coastline. Fortunately pretty much all of that weather has exited and high pressure will begin building in today. There is one more piece of instability that will fly through our area late this morning into early/mid afternoon that will provide a few extra clouds and a 20% chance of shower, otherwise look for more sun than clouds early this morning and again later on this afternoon. West to northwest winds will become gusty today with a max gust approaching 20 mph possible and those downsloping winds will dry us out as dewpoints fall from the 60s through the 50s, while at the same time warming us up from the 60s now to just past 80 degrees midday. Tonight the wind will eventually let up allowing for clear and potentially near record cool conditions with lows in the mid 50s. Sunshine on Saturday will mix with just a couple of fair weather clouds after lunch when highs get into the mid to maybe upper 70s. Winds will be lighter on Saturday as well with super low humidity as dewpoints hang around 50 degrees.
