

SATURDAY, JULY 31, 2021 – 5 AM WEATHER FORECAST

Technically we are close to tying a record low this morning with low temps starting out in the mid 50s, but overall enjoy this glorious weather today for the last day of July as high pressure slides across New England. We should see lots of direct sunlight today with a few clouds passing by to our south this morning and then a few fair weather clouds overhead and especially more so to our north this afternoon. Temps will warm up into the middle 70s this afternoon with comfortably low humidity as dewpoints hang around 50 degrees. Northwest winds this morning will let up by lunchtime allowing a subtle shift over to a more southerly Sound breeze at times this afternoon, all staying mainly at or below 10 mph today. Tonight will be mainly clear with lows in the lower 60s with light winds. Sunday starts off mainly sunny, but quickly we should see clouds filling in to our southwest as the next storm system throws some showers in our direction before the end of the day. More southerly flow on Sunday will also bring the humidity up with dewpoints aiming to rise above 60 degrees and temps climb through the 70s towards 80 degrees.
