

SUNDAY, AUGUST 1, 2021 – 5 AM WEATHER FORECAST

Temperatures were able to slip just below 60 degrees overnight and with more sun than clouds through the first half of this morning we should quickly try to warm up as much as possible with temps quickly climbing into the 70s, probably topping out in the upper half of the 70s shortly after lunchtime. Dewpoints will be a little higher today to rising through the 50s and getting into the 60s at times today due to an increasing southerly breeze. This is all in advance of a storm system sliding through the Northeast this evening first giving us increasing clouds this morning with skies becoming partly sunny to mostly cloudy for this afternoon. On radar the showers are starting off a little farther south than the models thought and that should help us stay away from the heavier rainfall this evening. Therefore look for the possibility of a rogue shower or sprinkle at times late this morning through mid afternoon with the main threat of measurable precip coming after play this evening. The forecast then turns nice again on Monday with a mix of sun and clouds, dewpoints falling back through the 50s with highs close to 80 degrees.
