

THURSDAY, AUGUST 12th, 2021 – 6 AM WEATHER FORECAST

We totaled approximately 0.16" of precipitation here at Oakmont between the two systems that passed through yesterday afternoon and evening. Expect mostly sunny skies Thursday morning before clouds start making their way into the area just after lunchtime. A clear start will warm us up quickly with temps in the mid 80s by 10 AM before topping out in the low 90s this afternoon while winds will once again remain out of the SW gaining speed as we warm up throughout the day today. Dewpoints will remain in the 70s with yesterday's rainfall allowing our heat index to approach 100 degrees this afternoon. Overnight temps fall back into the lower 70s as winds die down into Friday when we reintroduce the chances for showers and storms with the best chance taking place between 2 PM and midnight ahead of cold front workings way into the region Friday night when the winds will shift to the north and begin to remove the chances for any electricity Saturday afternoon into Sunday as we are finally able to break up this excessive heat and humidity and get back down to normal temperatures for the time of year.
