

FRIDAY, AUGUST 13th, 2021 – 6 AM WEATHER FORECAST

A combination of the two storms yesterday gave a grand total of 1.41 inches of rain at the clubhouse before midnight on Thursday. Skies have started to clear this morning as we look to take a break in the action for a few hours before the arrival of the cold front this evening will once again generate a series of showers and storms, mainly between 7 and 10 PM while the possibility for scattered events take place between 1 and 6 PM this afternoon. Winds for the day will remain out of the SW but slightly weaker with speeds between 5 and 10 mph gusting up to 15 mph at times. Conditions will once again be warm and muggy with highs today in the upper 80s and dewpoints in low 70s before the cold front acts dropping the highs for the weekend into the upper 70s with overnight lows near 60 degrees. A wind shift to out of the north will accompany the cold front tonight as a high pressure system over the Great Lakes forms, helping curb any lifting from taking place and removing the chances for showers and storms to form starting mid morning Saturday through Sunday evening.
