

### SATURDAY, AUGUST 15th, 2021 – 7 AM WEATHER FORECAST

Nice to start a morning discussion without the need to talk about the previous day's weather. A high pressure has formed in southern Ontario as expected late Saturday and will continue to move slowly east over the course of the day Sunday. With the movement of this high NE winds seen at the start of the day will shift to out of the east near the start of the championship final while speeds will be between 5 - 10 mph gusting as high as 15 mph through the afternoon and evening. Passage of the cold front will allow overnight temps to get down into the low 60s Saturday night giving us a cool start to Sunday morning while a mixture of sun and clouds will allow temps to warm up into the upper 70s Sunday afternoon. Dewpoints are expected to climb back into the mid to low 60s Sunday as well with more cloud cover expected to occur just before the start of the Championship Match sticking around through Sunday into Monday morning as warm/moist air begins to fill back in behind the frontal passage allowing for the chance of rain to start the day Monday before showers are once again expected to return Monday afternoon.
