

FRIDAY, JUNE 3, 2022 – 5 AM WEATHER FORECAST

We received 0.01" of rain with a shower shortly before dawn this morning, otherwise we are looking at another warm day today, however not quite as hot as we've had all week. It will feel muggier though due to the overnight moisture with dewpoints hanging in the 60s today while highs push into the upper 80s by lunchtime. North and northwest winds will be light at times today and will gust over 10 mph at times today too, but drier air really does not work into our area until Friday night into Saturday. Therefore as the atmosphere heats up this morning we will be on the lookout for pop up showers and storms to develop with the initial wave potentially developing near Pine Needles towards lunchtime and as that moves away early to mid afternoon we may be watching another area of hit or miss showers and storms matriculating in our general direction again later in the afternoon. The models keep this 40% risk of rain in the forecast tonight through breakfast on Saturday, then east and northeast flow takes over drying us out and giving us what looks to be a pretty decent weekend.
