

MONDAY, JUNE 13, 2022 – 5 AM WEATHER FORECAST

So far this morning we have received around a tenth of an inch of rain with this system as the heavier cells with electricity have stayed just to our south and are moving east towards the Cape. Look for clouds to decrease this morning as the rain exits and the sun starts to poke through. This will warm us up quickly towards the low 80s this afternoon. There is still the threat of a pop up shower or storm by lunchtime through dinnertime today, however almost every model keeps us dry. Southerly flow right now will transition over the west and northwest as the day progresses, but will not become all that breezy. Look for high pressure to take control of our weather tonight through Tuesday as offshore flow keeps us seasonably warm. Wednesday may be a touch cooler as the wind comes in more off the water, then when southwesterly winds blow in here Thursday, we'll heat up ahead of the next real front for Friday.
