

### MONDAY, JULY 18th, 2022 – 6 AM WEATHER FORECAST

We picked up 0.88” of rain last night through this morning, while we continue dodging a few more showers and rumbles of thunder to our south and southeast. A 60% chance for a few more showers and even a couple storms later this morning, becoming more scattered in the afternoon. The high today settles in the mid 80s as the sun tries to poke through today’s cloud cover. Southwesterly winds weaken overnight alongside a nice clearing, which will introduce some patchy fog into Tuesday morning. Sun to start the day on Wednesday, but as the hair dryer kicks on with our winds picking up at times within the low to mid 20s. A hot afternoon high of 96 degrees with the added humidity will send out heat index into the low 100s at times so take shady precautions and pump the electrolytes. The weak cold front continues its approach from the northwest and looks to bring in a small amount of moisture after sunset Wednesday, which can provide a shower and a few extra clouds. High pressure filters in across the southeast for the end of the week as we see a warm up with temperatures climbing through the low and mid 90s.
