

MONDAY, JULY 25th, 2022 – 6 AM WEATHER FORECAST

Temperatures will be starting off in the upper 40s this morning with light winds out of the north allowing the marine layer to set in. Similar to what we saw on Sunday, look for marine layer to start to burn off between 9 and 10 AM this morning allowing winds speeds to pick up, but remaining less intense than we have seen the previous two days with averages this afternoon in the low teens gusting into the high teens at times. Temperatures across southern Oregon are expected to flirt with records this week as a vast ridge sets up over the region forcing forecasts to call for haze to start to fill the sky this afternoon impacting visibility somewhat as temps along the coast once again get into the low 60. Winds will once again fall off overnight as very dry air will allow temps to fall back into the 40s again. A heat low developing in northern CA on Tuesday will have our winds shifting out of the north for the first time, first over to the W around noon before settling out the WSW late Tuesday afternoon holding there through the evening before settling to light and variable overnight Tuesday.
