

## TUESDAY, JULY 26th, 2022 – 6 AM WEATHER FORECAST

The marine layer will be the story on Tuesday as continued light winds overnight have allowed a thick layer of fog to set in along the southern Oregon coastline. We can expect to see this hold on through the early morning hours before warm air above starts to burn off things at the surface between 8 and 9 AM while winds will then start to blow from the WNW late this morning before shifting over to the SW this afternoon, noticeably calmer than we have seen up to this point with averages near 6 mph gusting up to 12 mph at times. With the marine layer forecasted to hang with us as temperatures on Tuesday will be much cooler than we saw on Monday with highs not expected to remain in the mid 50s throughout the day. Similar to Monday, winds will start to die off early this evening allowing fog to once again push its way onshore becoming fairly thick overnight Tuesday into Wednesday morning with overnight lows now dropping slightly into the low 50s. For Wednesday, we will once again be waiting for thick surface fog to burn off as winds start to blow from the northwest, where they are expected to remain the rest of the day.
