

WEDNESDAY, JULY 27th, 2022 – 6 AM WEATHER FORECAST

The marine layer at the surface is expected to become more dense over the next two hours before once again pushing back out into the Pacific between 8 and 9 AM this morning as winds start to pick up from the NNE before shifting over to the NNW just before noon with speeds on Wednesday averaging around 8 mph gusting into the low teens this afternoon. Temperatures will warm out of the upper 40s just after sunrise this morning, continuing to warm throughout the day under a mixture of sunshine and high thin clouds into the 60s while dewpoints will top off in the mid 50s keeping things feeling very comfortable for the first round of match play. As the winds calm down late this evening the marine layer will work its way back onshore increasing cloud cover just before sunset dropping overnight lows back into the low 50s Wednesday with fog once again expected to form early Thursday morning, burning off quicker after sunrise than the previous two days allowing temps once again to warm into the 60s with wind blowing from the NNE shifting more northerly and holding there through the day with speeds near 10 mph gusting into the teens.
