

THURSDAY, JULY 28th, 2022 – 6 AM WEATHER FORECAST

The marine layer will become slightly more dense between the 7 and 8 AM hours and evaporative cooling acts to limit visibility directly at the surface. Once we sun the sun overhead burn through this marine layer sending it back out over the Pacific, temperatures will warm up quickly into the upper 50s this morning as winds then pick up mainly from the NNE in the AM before increasing once again this afternoon as it continues to shift more onshore blowing out of the NNW increasing into the low teens gusting into the upper teens at times. Similar to what we saw Wednesday, look for the marine layer to roll back onshore briefly between 1 and 2 PM this afternoon during high tide along our coast otherwise a mixture of sunshine and high clouds is expected to provide an afternoon high right at 60 degrees this afternoon ahead the marine layer then returning this evening just before sunset dragging winds down to light and variable overnight dropping temps back into the low 50s.
