

MONDAY, AUGUST 8th, 2022 – 6 AM WEATHER FORECAST

Another cool start to things with overnight lows falling into the mid 50s will once again heat up very quickly this morning under mostly sunny skies and light and variable winds. Winds will start to pick up just before lunchtime with a mostly northerly flow with speeds a tick slower than we saw yesterday afternoon. The NWS has continued to issue a heat advisory across the area with unseasonably warm temperatures so make sure to stay hydrated today as afternoon highs once again climb into the upper 80s. Thicker clouds will start to roll into the area from the south on Tuesday keeping us somewhat cooler than we will get on Monday as the low pressure system starts to work its way onshore from our southwest introducing our first chance for raindrops Tuesday night into early Wednesday afternoon. Little accumulation is expected here at Chambers with this system providing us more of a gray drizzly PNW type of day Wednesday while thick cloud cover will have temperatures struggling to climb into the 70s Wednesday afternoon as winds then shift over to the SW where they are now expected to remain through Friday.
