

TUESDAY, AUGUST 9th, 2022 – 6 AM WEATHER FORECAST

The system to our SW will finally start to break our heat wave Tuesday with clouds continuing to roll in from the south. Radar has shown a couple of drops associated within these bands of clouds and there is a chance a few fall across the course this morning as they pass overhead but accumulation is expected to occur. As the clouds start to burn off between 10 and 11 AM this morning looks for the winds to shift from the SW over to the NW once again this afternoon with the slow start to heating keeping our temps in the low 80s this afternoon. For Wednesday, this secondary wave of potential showers has slowed down in the models with things now taking place early morning through noon with a small chance for thunder across the area with temperatures struggling to climb into the 70s and winds blowing from the SW near 10 mph gusting into the mid teens at times. Starting Thursday conditions revert to normal across the entire PNW with cloud cover overnight into the morning keep temperatures near 60 degrees to start the day before the sun is able to then come out pushing highs into the low 80s this afternoon.
