

### THURSDAY, AUGUST 11th, 2022 – 6 AM WEATHER FORECAST

A much weaker marine layer set up overnight Wednesday generating periods of clear skies that allowed temps to fall back into the 50s as expected to then go along with light and variable winds across the property. Any wind that does decide to go blow will begin to occur mid morning with the sun acting as a catalyst by burning off the marine layer overhead. In a complete "180" from conditions on Wednesday mostly sunny skies will heat things up quickly this morning with temps jumping to near 65 degrees mid - morning continuing to heat up near 80 degrees late this afternoon in near ideal weather conditions for the PNW. Even with the daytime heating, winds are expected to remain fairly still throughout the day with speeds topping out around the 5 mph mark with gusts struggling to reach double digits as the third round groups make the turn late this afternoon. Overnight tonight warming temps will generate a thicker marine layer Friday morning with overnight lows slightly warmer than this morning but then taking longer to warm due the marine layer holding on overhead into late Friday morning acting to keep the high in the mid 70s.
