

THURSDAY, AUGUST 25, 2022 – 5 AM WEATHER FORECAST

With the high pressure now directly to our east winds will begin the day out of the SW staying there through the morning hours before shifting slightly to the west becoming WSW as we finish up play this afternoon while speeds then start to pick up front the morning as the the drifts further to our east making way from the approaching front to arrive on Friday. Weather for Thursday once again looks to be ideal for golf with temperatures starting out this morning near 60 degrees as moisture continues to struggle to find its way into the Ohio Valley. We lose the influence of the high pressure overnight tonight as clouds start to fill up the sky as the surface boundary layer begins its approach from our NW arriving into the southern Ohio Valley late Friday morning bringing along with it scattered showers and the chance for popup thunderstorms to go along with it. Cloud cover and weak passing cold front will keep temps slightly cooler with highs back in the low 80s tomorrow afternoon as winds shift from the SW back over to the NW finishing up the day out of the north as the low makes its way through the area into KY.
