

### SUNDAY, AUGUST 28, 2022 – 5 AM WEATHER FORECAST

High pressure at the surface over the east coast will continue to drift further away while winds at the low and mid - level combine to continue to transfer warm, humid air into the Ohio Valley on Sunday pushing our temperatures to the warmest we have seen all week with highs today topping out in the low 90s with winds starting the day out of the SE will shift over to the S this afternoon with speeds higher than the previous days, now averaging near 9 mph with gust in the mid teens at times. With hot, humid air at the surface there is a chance for a pop - up shower or storm to form late this afternoon but it looks like the precipitation will wait until the overnight hour into Monday where a full day of storms is a possibility with a quarter of inch of rain expected to fall here at NCR. Winds will continue their shift with the approaching storm, remaining mainly from the SW on Monday while the increasing cloud cover will have temperatures back near normal Monday afternoon, topping out in the mid 80s under a mostly cloudy sky for the majority of the day.
