

SUNDAY, SEPTEMBER 18th, 2022 – 6 AM WEATHER FORECAST

A whopping 3.47" of rain fell yesterday, mainly just after the first round of stroke play with the persistent heavy rain that engulfed the coast. Quite a bit of moisture around this morning with some friendly low clouds keeping the morning quite nice, before some sunshine peeks through warming things up. With dew points climbing into the mid and even upper 70s at times, watch for the heat index to climb into the low 100s, so pump the electrolytes and snacks. Today's high temperature will climb back near 90 degrees as the 40% chance for a pop-up shimmies back in for the mid-afternoon and evening hours. Radar may seem less active this afternoon and will hopefully allow us here at Fiddlesticks to catch a deserved breather. Winds will be a bit lighter today, before turning back southerly with the sea breeze later in the day. A decrease in moisture through midweek will help us dodge most of any isolated to scattered storms during the afternoon and early evening. Thursday is looking better and better even as Fiona treks further west. She is still anticipated to lift northeast back across the Atlantic, which will pull in this drier northeast flow.
