

MONDAY, JUNE 10, 2024 – 5 AM WEATHER FORECAST

The rain gauges got more than they wanted to handle last night as 0.31" to 0.52" fell across the course with the storm that intensified right over Pinehurst at 10 PM. Thankfully the radar has improved, but we'll still have to keep a watchful eye to our south this morning as showers will continue to skirt by to our south, occasionally raining at Pedro's South of the Border pit stop on I-95, but we should not really have much, if anything, here. We'll maintain a 20% risk of a shower or rumble this afternoon, however we should find ourselves stuck in between the action exiting to our southeast and tonight's disturbance approaching from the northwest. Clouds this morning will give way to periods of sunshine this afternoon warming us up into the mid to maybe high 80s. After having higher humidity late yesterday, dewpoints will be lower this afternoon with shifting winds. Tonight we will not see nearly as much action on radar as we had last night, but an isolated shower or rumble is not completely out of the question. Tuesday's forecast is nicer than today and Wednesday looks decent too before the threat of weather reemerges Thursday on.
