

WEDNESDAY, JUNE 12, 2024 – 5 AM WEATHER FORECAST

Clear skies and comfortably cool temps are beginning the day. Sunshine this morning will begin to be filtered by high clouds as we get closer to lunchtime with eventually a smattering of low clouds and high clouds mixing with our afternoon sun. We'll mention a 20% chance of a shower or rumble, but it does appear very likely this afternoon. Highs will top out in the upper half of the 80s this afternoon, then we'll be milder tonight under a continuation of high cloud cover keeping temps up a notch or two. Thursday has high clouds lingering in the morning with potentially a little less afternoon lower clouds mixing in. Temps will hit 90 degrees tomorrow afternoon with another period of southeasterly flow from lunchtime on. Dewpoints hanging around 60 degrees or so today and tomorrow will come up a bit on Friday as well temperatures with Friday reaching the mid 90s. In the next forecast we'll have some short range models that see Friday better, so for now we'll keep a 40% risk of a shower or rumble for the second round in case we are hot enough and humid enough to force the atmosphere to create something on radar to stabilize us.
