

SATURDAY, JUNE 15, 2024 – 5 AM WEATHER FORECAST

The cold front we have been discussing the last couple of days has passed through Raleigh with a few showers and even a storm. So look for a 40% chance of a shower and 20% chance of a storm up until 8 AM, then the front will clear Pinehurst with skies gravitating towards a mostly sunny look by mid morning through lunchtime. There will be more clouds billowing up as we head through this afternoon with a 20% chance of a shower or storm trying to form near us. The good news is that the majority of the models suggest that the eastern side of I-95 down towards Wilmington will be the bullseye for scattered showers and storms. This is because even though we have northerly flow getting gusty mid to late morning, our dewpoints will drop behind this front very gradually. After the warmest start this week, temps are projected to climb into the low 90s this afternoon with a heat index a few degrees hotter - but overall still a couple degrees less than yesterday. Northeast winds this afternoon slacken by the end of the day with high pressure to our northeast trying to provide a slightly nicer day on Sunday.
