

SUNDAY, JUNE 16, 2024 – 5 AM WEATHER FORECAST

Happy Father's Day! Temps managed to reach 92 degrees yesterday and overnight east to southeast winds kept temps just above 70 degrees. Look for more of those east to southeast winds to be fairly consistent today spending a lot of time in the 5-10 mph range with gusts of 10-15 mph at times. There should even be a period around mid or late morning when we could be a brief notch more. Mostly sunny skies at sunrise will end up turning into periods of clouds and sun by mid or late morning on. Temps will top out in the upper 80s to around 90 this afternoon with dewpoints a touch lower than yesterday hanging out mostly in the lower half of the 60s. So it will still be hot later on, just not as hot as it has been with a heat index in the lower half of 90s. Our chance of precip today is 20% for an actual shower. We wouldn't be surprised if we saw a raindrop/sprinkle (40% risk) at some point, but the models back in a decent agreement that the worst of the weather will stay around Charlotte and points west into the mountains. It'll just be a matter of whether or not we'll get a shower or storm in the adjacent counties to our west and southwest.
