

TUESDAY, JUNE 25, 2024 – USSO 5 AM Weather Forecast

A few sprinkles after midnight but no accumulation as the heaviest of the rain remained to our east and north overnight. The cold front has worked its way past Newport with the winds now firmly ingrained with a northwest flow this morning as cool air overhead has chased away our cloud cover a little earlier than expected pushing lows down into the mid 60s as the sun is coming up. A sunshine filled day awaits at Newport CC with sparse cloud cover through the morning hours allowing temps to once again make their way into the 80s around 12 PM this afternoon. As we heat up this morning, winds will begin to rotate back over to the SW throughout the day, with speeds tapering off through the middle portion with a westerly flow before picking back up late this afternoon through the night where it will remain through the day on WED, as breezier conditions return with averages in the upper teens near 20 mph gusting to near 30 mph for much of the day WED. Radar will remain clear for the next 36 - hours ahead of the scheduled surface boundary arriving overnight WED, first with storms and then light rain into the afternoon THU.
